

Eggers... dedication to quality

The company Eggers Fahrzeugbau was founded in 1953 and taken over by its current owner, Mr. Reinhard Eggers, from his father in 1972. At this time, the company's main business was still the shoeing of horses and all the other services a smithy could provide. But the company quickly shifted its focus to vehicle construction, trailer manufacturing and bodywork.

Particularly custom-built vehicles with an individual touch assured that Eggers Fahrzeugbau became a well-known name in Germany. In addition to the excellent training of our personnel in every department and our state-of-the-art equipment and machinery, ensuring the high quality of our products has always been at the heart of the Eggers company philosophy. In the early 1990s, Eggers Fahrzeugbau was awarded the ISO 9001 certification which further emphasizes our dedication to outstanding quality.

Today, the company has 70 employees who develop a large variety of individual solutions for the transportation and logistics field. Eggers offers a wide variety of different vehicles, ranging from heavy duty trailers and semitrailers via platform and container vehicles, vehicles with tipping devices, interior racking solutions for smaller vehicles to custom-built vehicles for highly specialized tasks. Every main product category has its own sales and manufacturing department.

All departments are supported by a team of eight engineers and technicians, providing drawings and technical documentation for the ongoing production process. Moreover, our engineering team develops specialized solutions for our customers, using state-of-the-art computers and 3D-graphics software.

In 2003, our good relations with the Unimog production plant in Wörth led to a lot new solutions for modifying the Unimog truck. Eggers is particularly proud of being the exclusive manufacturer of the Unimog driving unit.
